

Gurskøy Provisions Platform

Gurskøy Provisions Platform is a new product from Gurskøy that has received excellent reviews from our customers. The platform is entirely mechanical, with no hydraulics. The platform can easily be operated by one person, swiftly and efficiently.

Platform 1400 x 2000 mm.
Capacity SWL 1500 kg.

The platform is hinged on a swing arm so that it can be turned inwards and to the side in the upright position when not in use. It is suitable for use in a standard ship's door in the ship's side and is therefore a very efficient and less costly solution.

The platform has a ramp that slopes inward. The inclined ramp is hinged to the platform and folds up vertically when the system is turned to the side. The inclined ramp can be replaced by a step if required. The platform has a rope railing with removable stanchions.
