

Gurskøy Freezer Racks

Gurskøy Freezer Racks stand out due to their rugged design, highly accurate dimensions and outstanding technical design. The Freezer Racks have been designed in close consultation with fish processing plants and freezer system suppliers and are manufactured cost-effectively using welding robots.

They are custom-made for each production plant.

Suitable for use with other types of racks.

Made of either hot-dip galvanised steel or stainless steel.

Gurskøy also supplies Freezer Racks made specifically for plastic trays for deep freezing salmon and trout.

Gurskøy Freezer Racks are the dependable choice.

Gurskøy has been providing global customers with its Freezer Racks for many years.
